

Sump Pumps

Dual Float, Deluxe Float, Battery Backup + Wi-Fi

At some point, most homeowners face the challenge of a flooded basement. Whether caused by a burst pipe, a leaking water heater, or heavy rainfall, the damage can be costly and stressful. A sump pump provides a reliable solution, offering peace of mind by protecting your basement from flooding and preventing water damage before it starts.

State of Michigan Drinking Water Contamination Guide

Preventing Flooding

Sump pumps prevent basement flooding by removing water before it accumulates, protecting your home from costly damage.

Improve Indoor Air Quality

Prevent mold and mildew growth with a dry basement. Sump pumps help maintain healthier indoor air quality for your home.

Protect Belongings

Keep your valuables safe. Sump pumps ensure a dry basement, shielding furniture, electronics, and personal items from water damage.

Increase Home's Value

Buyers are willing to pay a premium for homes that are equipped with a sump pump as a safeguard against flooding and water damage.

Sump pumps protect your home by collecting water from your basement or crawl space and pumping it safely away from your foundation. Typically hardwired into your home's electrical system, many models also feature a battery backup to ensure continuous operation, even during power outages.

When activated, the sump pump removes water from the pit and directs it away from your home through a discharge pipe. This pipe may connect to a buried drainage system in your yard or an ejector pump that efficiently moves water away, safeguarding your home from flooding.

Pro Series Sump Pump Dual Float Controller

- Designed for higher pumping capacities, increased energy efficiencies, resulting in proven reliability
- Cast iron / stainless steel construction
- Primary float switch activates the pump when water reaches the float
- Secondary float acts as a fail-safe for the first
- Peace of Mind – Good

Pro Series Sump Pump Deluxe Float Controller

- Designed for higher pumping capacities, increased energy efficiencies, resulting in proven reliability
- Cast iron / stainless steel construction
- Dual carbon/ceramic seals, and stainless steel shaft
- Deluxe Controller monitors power conditions and sounds an alarm when AC power is out, circuit breaker is tripped, float has been raised for more than 10 minutes, or 9-volt battery needs replacement
- Peace of Mind – Better

Pro Series Sump Pump Battery Backup & Wi-Fi

- Automatically switches to battery power when AC fails
- Recharges automatically
- Advanced computer controlled monitoring system
- Designed for use with maintenance or maintenance free batteries
- USB Data Port and Remote Terminal allows the unit to connect to one of many devices
- Caged dual float switch for added redundancy
- Pro Series Connect Wi-Fi Module connects to your home's Wi-Fi and sends pump notifications while away from home (Optional)
- Peace of Mind – Best

Additional Options

- Wi-Fi Module**
